AT JavaStation - An Overview - Sun Microsystems

REMARKS

Copies of each of the above references together with Form 1449 are submitted herewith.

Document AL, German DE 43 35 690 A1 is directed to an architecture for a configurable parallel computer which has matrix arrays of logic units that are programmably interconnected and communicate to the host system.

Document AM, German DE 196 14 991 A1 is directed to a phase-synchronous flexible frequency operation for a scalable, parallel dynamically

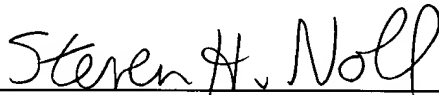

reconfigurable computer which uses configurable processor units and a general purpose interconnect matrix.

Document AN, German DE 196 54 766 A1 is directed to a different communication protocol network terminal which has a processor responsive to a first and at least second personalities for processing one of first and third sets of instructions.

Document AP, German DE 198 15 865 A1 is directed to a software compilation method for a reconfigurable computer compiler compiling source data using several instruction set architectures specified by reconstruction translation statements.

All claims of the application are submitted to be patentably distinguishable over the teachings of the above references, taken singly or in combination. Early consideration of the application is therefore respectfully requested.

Respectfully submitted,

(Reg. No. 28,982)
